Article 14: 9th November 2009

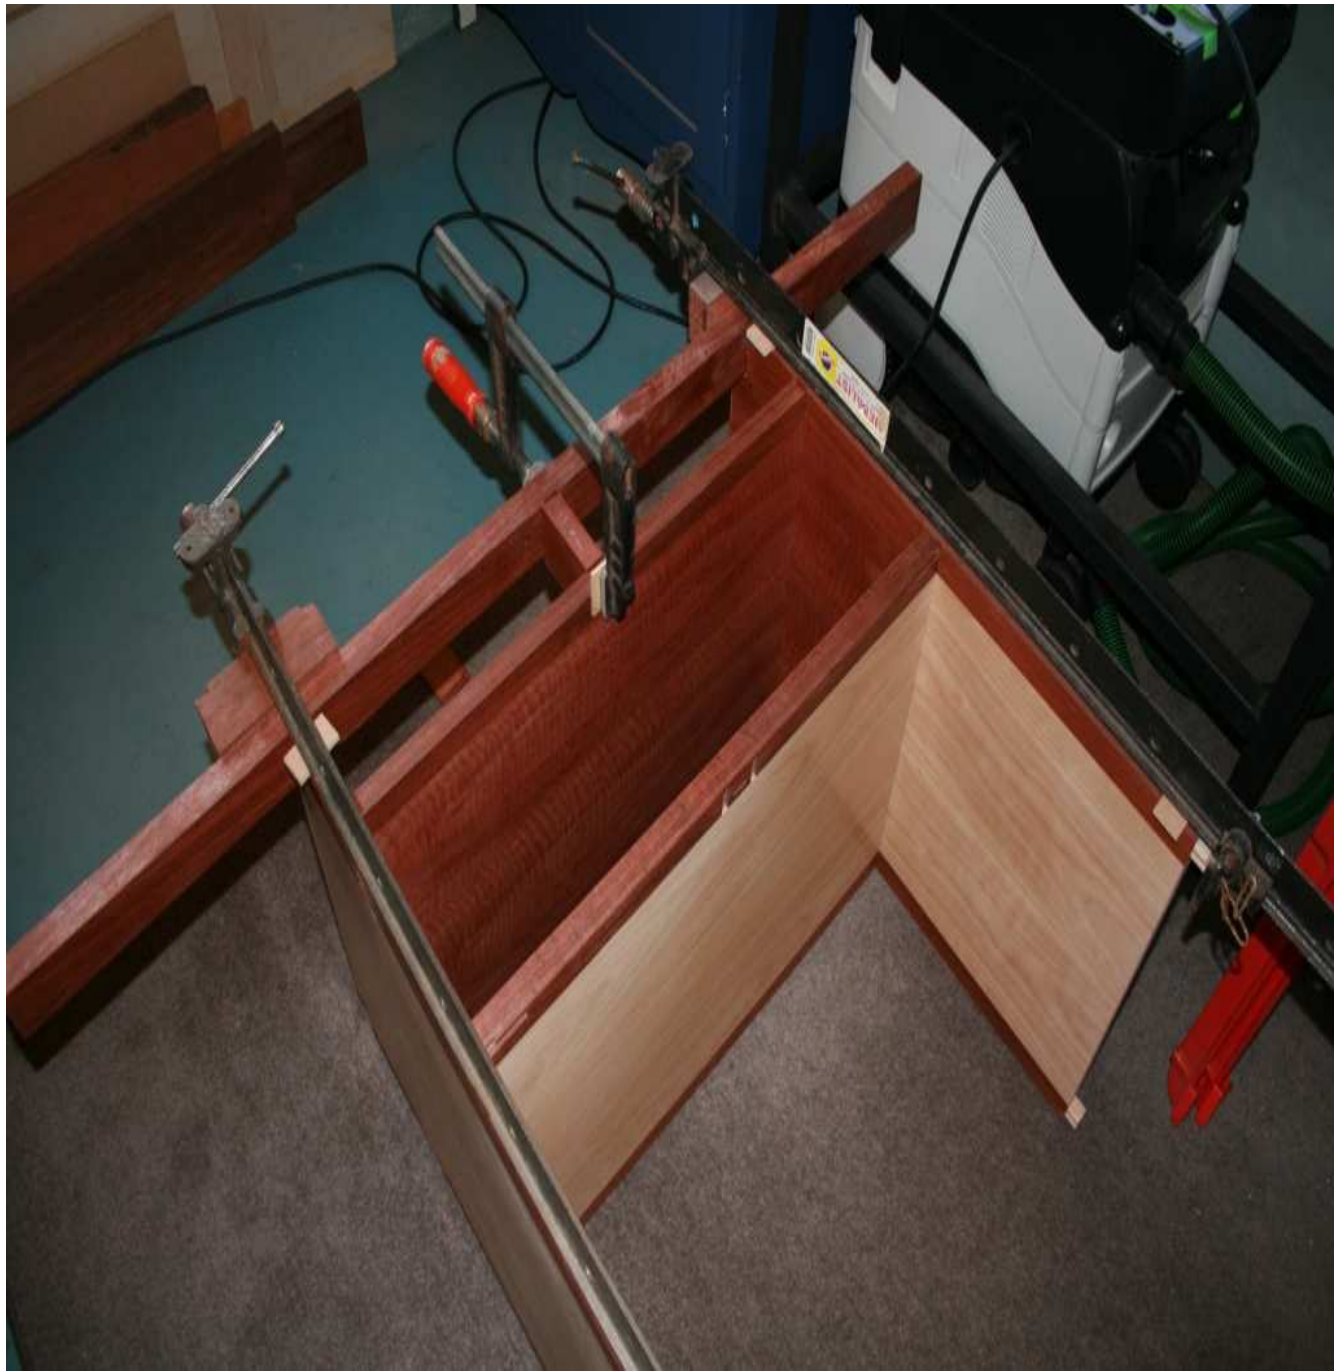

Piece: Sideboard

Subject: Carcass Glue-Up 4.

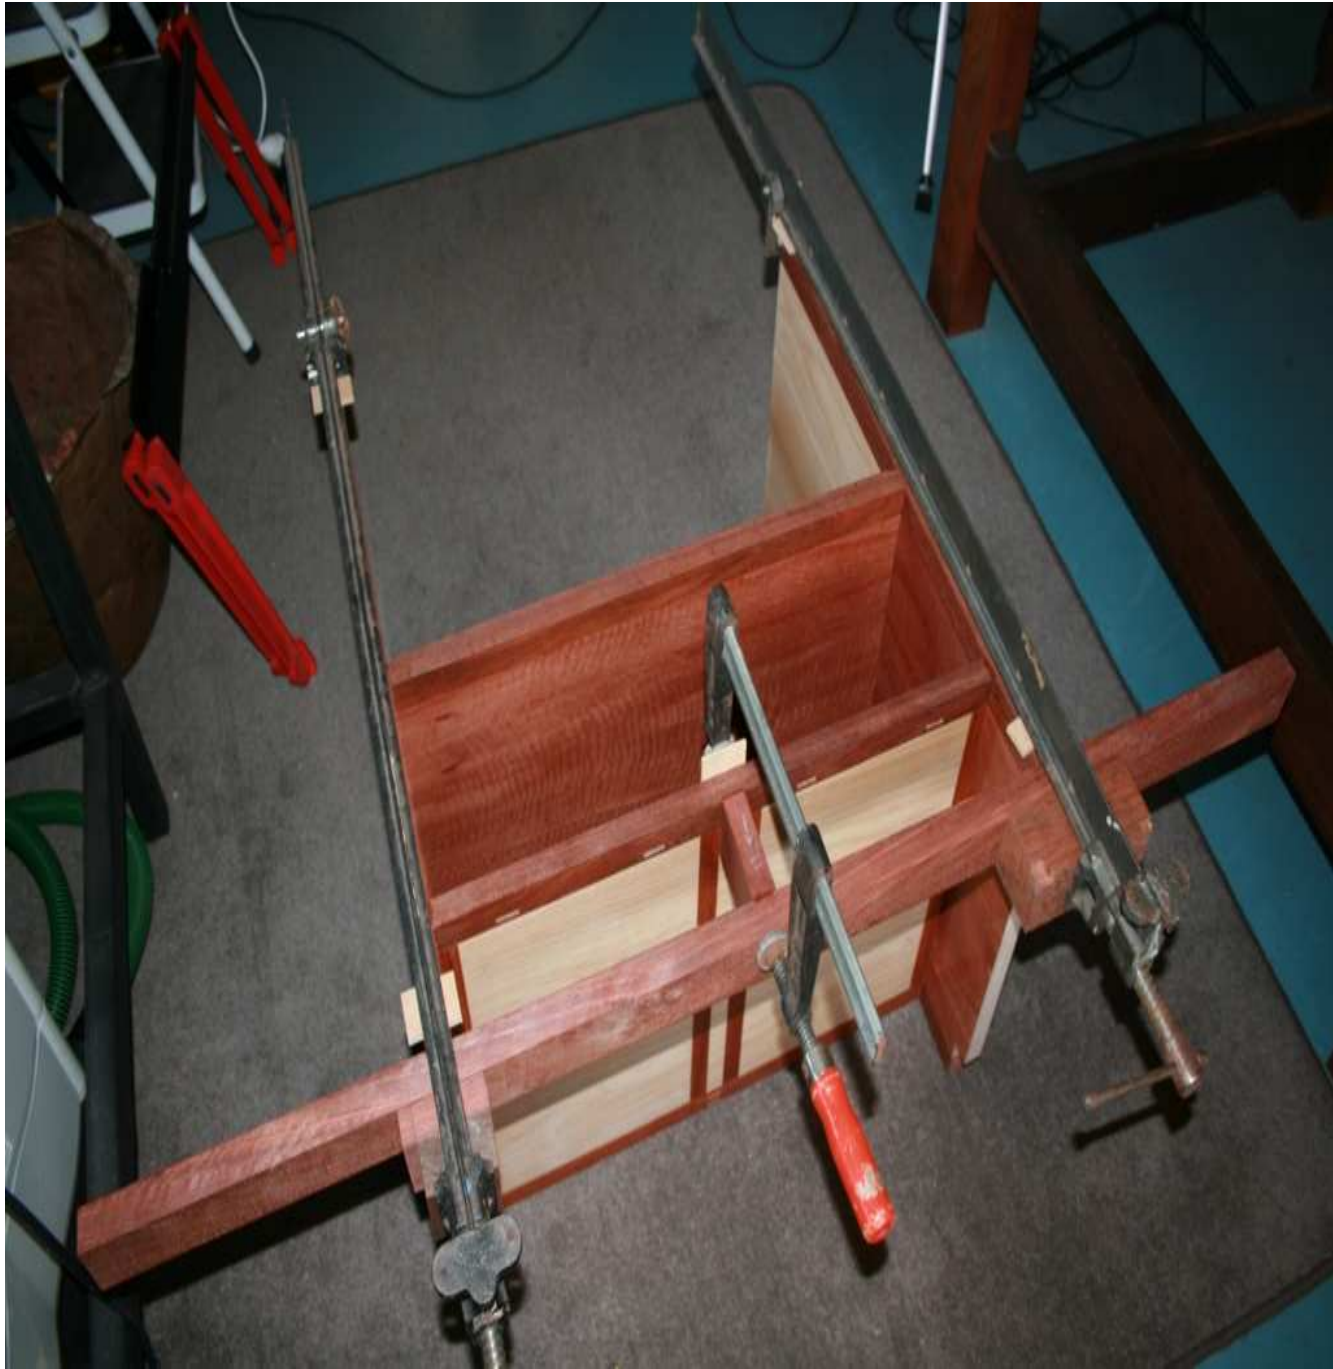

Carcass glue-up 3 has made a stiff central carcass. I am very confident that this is square and true. The next two glue-ups are securing the front and back top rails and the central drawer dividers.

Glue-Up 4 is the front top rail and central drawer divider being glued to the central carcass which was glued together in Glue-Up 3.
